序言

FOREWORD

人口分布推算小組（推算小組）參照政府統計處的全港人口推算，定期編製本港的人口地區分布推算數字，其中包含按區議會分區、新市鎮及小規劃統計區劃分的人口分布數字。此外，推算小組亦編製各區議會分區及新市鎮的人口年齡結構推算。這些推算結果可作為政府在地區層面規劃工作的依據。

推算小組剛完成編製一套涵蓋期為二零二三年至二零三一年的人口地區分布推算。有關推算採用了政府統計處於二零二三年八月發布的最新一套全港人口推算數字，作為規限總數。

有關推算參照了截至二零二三年第二季止，已知悉的房屋發展建議的規劃資料及其他假設。倘若這些房屋發展建議的類別、規模和實施時間或推算小組所作出的假設其後有任何改變，推算小組會在下一輪推算工作中，更新有關推算數字。

本報告書載列推算結果及簡述所採用的推算方法。

規劃署署長
鍾文傑

二零二四年三月

Projections of geographical distribution of population are prepared on a regular basis by the Working Group on Population Distribution Projections (WGPD) taking account of the Census and Statistics Department (C&SD)'s territorial population projections. They include data on the projected distribution of population by District Council District (DCD), New Town, as well as Tertiary Planning Unit. In addition, the projected age structure of population in individual DCs and New Towns are also compiled. These projection results provide the Government with a basis for forward planning at local levels.

The WGPD has just completed compiling the projections of geographical distribution of population covering the period 2023 – 2031. The projections have adopted the C&SD's latest set of territorial population projections released in August 2023 as the control totals.

The projections have taken into account planning information on housing development proposals known up to the second quarter of 2023 and other assumptions. Any subsequent changes to the type, scale or timing of the housing development proposals concerned or the adopted assumptions will be taken note of in the next update of the projections.

This report presents the projections results and briefly outlines the methodology.

1. 引言

1.1 人口分布推算小組定期編製本港的人口地區**分布**推算數字，作為政府在地區層面規劃和提供各項設施及服務參考之用。本報告書載列最新一套以二零二一年及二零二二年年中人口為基數，涵蓋期為二零二三年至二零三一年的人口地區分布推算結果。

1.2 推算結果包括：

- (a) 按區議會分區、新市鎮及小規劃統計區劃分的人口推算數字；和
- (b) 按區議會分區及新市鎮劃分的人口年齡結構推算。

1.3 本報告書刊載推算期至二零三一年按區議會分區和新市鎮劃分的每年人口推算數字。因資料可靠度的考慮，按小規劃統計區劃分的人口推算數字，則只涵蓋至二零二七年。

1.4 所有推算數字是指年中的數字。

人口涵蓋範圍和分布基礎

1.5 香港人口以「居港人口」量度。「居港人口」包括「常住居民」及「流動居民」。

1. INTRODUCTION

1.1 The Working Group on Population Distribution Projections (WGPD) produces on a regular basis projections of population **distribution** by geographical area for the purposes of providing a basis for the planning and provision of facilities and services at local levels. This report presents the results of the latest set of projections of population distribution covering the period 2023 - 2031, with the mid-2021 and mid-2022 population estimates as the population bases.

1.2 The projections results cover:

- (a) projected population by District Council District (DCD), New Town and Tertiary Planning Unit (TPU); and
- (b) projected age structure of population by DCD and New Town.

1.3 Projections for individual years up to 2031 are presented for DCDs and New Towns, while projections by TPU are given only for individual years up to 2027 in view of data reliability.

1.4 All projection figures refer to the middle of the years.

Population Coverage and Basis of Distribution

1.5 The Hong Kong Population is measured by the “Hong Kong Resident Population”, which comprises “Usual Residents” and “Mobile Residents”.

1.6 「常住居民」指兩類人士：(a) 在點算時刻之前的 6 個月，在港逗留最少 3 個月，又或在點算時刻之後的 6 個月內，在港逗留最少 3 個月的香港永久性居民，不論在點算時刻他們是否身在香港；及 (b) 於點算時刻身在香港的香港非永久性居民。

1.7 對於不是「常住居民」的香港永久性居民，如他們在點算時刻之前的 6 個月內，在港逗留最少 1 個月但少於 3 個月，又或在點算時刻之後的 6 個月內，在港逗留最少 1 個月但少於 3 個月，不論在點算時刻他們是否身在香港，會被界定為「流動居民」。

1.8 旅客並不包括在「居港人口」內，故本報告書不涉及旅客分布的推算。

1.9 人口地區分布通常以居住地點為基礎，所以一個地區的人口數目亦即在該地區居住的人數。

1.10 基本上，人口的分布是按其在港通常居住的地點劃分。至於在港居住地點多於一處的人士，其分布則以其逗留時間最長的居住地點為基礎。

1.6 “Usual Residents” refer to two categories of people: (a) Hong Kong Permanent Residents who had stayed in Hong Kong for at least 3 months during the 6 months before or for at least 3 months during the 6 months after the reference moment, regardless of whether they were in Hong Kong or not at the reference moment; and (b) Hong Kong Non-permanent Residents who were in Hong Kong at the reference moment.

1.7 For those Hong Kong Permanent Residents who were not “Usual Residents”, they were classified as “Mobile Residents” if they had stayed in Hong Kong for at least 1 month but less than 3 months during the 6 months before or for at least 1 month but less than 3 months during the 6 months after the reference moment, regardless of whether they were in Hong Kong or not at the reference moment.

1.8 Visitors are not included in the “Hong Kong Resident Population”. The projections of visitor distribution are hence not dealt with in this report.

1.9 Geographical distribution of population is generally made on the basis of place of residence. Accordingly, population of a particular area is made up of persons who live there.

1.10 Basically, the population is distributed according to their usual place of residence in Hong Kong. Thus, those with more than one residence in Hong Kong are distributed on the basis of the residence where they have stayed for most of their time.

1.11 但是，因應小部分在港不屬於任何住戶（即沒有固定居所）的「流動居民」，這個基礎須略作調整。概念上這類別的「流動居民」的分布會根據其在港逗留時間最長的地點劃分。

全港總人口推算數字

1.12 推算小組只編製人口**分布**，而人口總數則採用由政府統計處（統計處）另行編製的全港人口推算作為規限。統計處在二零二三年八月發表了最新一套以二零二一年人口普查所提供的基準人口數據為人口基數的全港人口總數推算結果。有關涵蓋二零二二年至二零四六年的全港人口推算，讀者可參閱統計處出版的《香港人口推算 2022-2046》（可透過統計處網站 www.censtatd.gov.hk 下載）。

地理分界制度

1.13 推算小組在編製人口分布推算數字時，採用三個地理分界制度，分別為區議會分區、新市鎮和小規劃統計區。

1.11 However, slight adaptation of this basis has to be made in the light of a small number of “Mobile Residents” who do not belong to any households, i.e. have no regular residence, in Hong Kong. Conceptually they are distributed according to the place where they have stayed for most of their time while in Hong Kong.

Projected Territorial Total Population

1.12 The WGPD only compiles population **distribution**, while adopting the total projected population separately produced by the Census and Statistics Department (C&SD) as control totals. The latest set of territorial population projections with the benchmark population data from the 2021 Population Census as the population base was released by C&SD in August 2023. Readers can refer to “Hong Kong Population Projections 2022-2046” published by C&SD (available for download from the C&SD website: www.censtatd.gov.hk) for the full set of territorial population projections covering the period 2022-2046.

Geographical Demarcation Systems

1.13 The WGPD adopts three geographical demarcation systems in compiling projections of population distribution, namely, DCD, New Town and TPU.

小規劃統計區

1.14 小規劃統計區是政府進行城市規劃時常用的地理分界制度。是項推算工作採用的小規劃統計區是在二零二一年人口普查中使用的版本（見地圖 1 至 3）。根據這套分界制度，全港的土地面積共劃分為 292 個小規劃統計區。為顧及數據的精確度，所有不足 1 000 人的小規劃統計區，都與鄰近的小規劃統計區合併後才發放有關的推算人口數字。

區議會分區

1.15 區議會分區是為方便分區行政及選舉之用。全港劃分為 18 個區議會分區（見附錄 1）。地圖 1 至 3 展示這 18 個區議會分區的分界。有關區議會分區與小規劃統計區的概括對照載列於附錄 2。

新市鎮及新界其他地區

1.16 除了區議會分區及小規劃統計區外，推算小組亦會編製以新市鎮分界劃分的人口分布推算。撇除新市鎮分界所涵蓋的地方，在新界的區議會分區的其餘部分則合併為四個其他地區。有關新市鎮／新界其他地區與小規劃統計區的概括對照載列於附錄 3。

Tertiary Planning Unit (TPU)

1.14 TPU is a common geographical demarcation system widely used by the Government for town planning purposes. The version of the TPU boundaries (see Maps 1-3) introduced in the 2021 Population Census is adopted in the present exercise. Under this boundary system, the whole land area of Hong Kong is divided into 292 TPUs. Owing to consideration of data precision, a TPU with less than 1 000 persons is merged with adjacent TPU(s) for disseminating the projected population figures.

District Council District (DCD)

1.15 DCDs are developed for district administration and election purposes. The whole area of Hong Kong is demarcated into 18 DCDs as given in Appendix 1. Maps 1 to 3 illustrate the boundaries of 18 DCDs. The broad conversion between DCD and TPU is given in Appendix 2.

New Town and Other Areas in the New Territories

1.16 Apart from DCD and TPU boundaries, WGPD also compiles population distribution projections in terms of New Town boundaries. Excluding areas covered by the New Town boundaries, the remaining parts of the DCDs in the New Territories are grouped into four Other Areas. The broad conversion between New Town / Other Areas in the New Territories and TPU is given in Appendix 3.

注意事項及特別註釋

注意事項

1.17 本套人口分布推算所使用的人口總數及眾多假設，均採自統計處以二零二一年為基期的人口推算。詳情請參閱統計處出版的《香港人口推算 2022-2046》(可透過統計處網站 www.censtatd.gov.hk 免費下載)。如統計處稍後更新其全港人口推算，推算小組亦會更新其人口分布推算。因採用了不同的假設及更近期的資料，更新後的推算數字可能跟本報告書內所載的不同。

1.18 推算小組的人口分布推算只涉及人口分布而非人口總數，並採用統計處推算的全港人口作為規限總數。故此統計處的推算內的假設及限制在這次人口分布推算中亦適用。

1.19 這套人口分布推算不能應用於量度不同地理分區的房屋或人口容量。

1.20 就建屋時間和建屋量而言，較遠年份的建屋預測會較最近推算年的建屋預測有機會受更多不明朗因素影響。這些預測是根據進行推算工作期間取得的資料所能作出的「最佳」預測。

Cautionary Remarks and Special Notes

Cautionary Remarks

1.17 The control totals and many assumptions used in this set of population distribution projections are adopted from the 2021-based population projections of C&SD. Readers can refer to “Hong Kong Population Projections 2022-2046” published by C&SD (available from the C&SD website: www.censtatd.gov.hk) for more details. If C&SD updates its population projections later, the WGPD will update its population distribution projections accordingly. The updated projection figures may be different from those presented in this report since different assumptions and more up-to-date data will be incorporated.

1.18 The WGPD’s projections of population distribution are only an exercise to project population distribution but not total population. The territorial total population projected by C&SD has been adopted as the control total. The assumptions and limitations of C&SD’s projections thus also apply to the population distribution projections.

1.19 The population distribution projections should NOT be taken as measuring the housing or population capacity of different geographical areas in any sense.

1.20 The forecasts of flat production for distant years are likely subject to more uncertainty than those for the nearer projection years in terms of their phasing and production level. They are the “best” forecasts then made based on the information available at the time of undertaking the present exercise.

1.21 除了上文載列的假設外，人口分布推算數字還根據許多其他更詳細的假設而編製的。當這些假設有任何變更時，所得出的結果也可能會截然不同。儘管推算小組在進行推算時，已盡量採用當時可能得到的最佳假設和資料來源，但每當有更新的資料和有新趨勢形成時，推算小組或需就推算方法加以改進。

1.22 在像香港這樣的動態城市，就一個如小規劃統計區的小地理分區而言，人口推算會有較大的誤差，尤其是較遠年份的數字。因此，在使用這些推算數字時，必須小心謹慎。

1.23 參考人口分布推算資料的人士必須留意上述的假設和限制，從而決定有關資料是否適合作某一特定目的和用途。對於使用人口分布推算資料而造成的任何後果，政府概不負責。

1.24 使用者複製或引用本報告書所載的人口分布推算資料時，均須註明資料來源為「人口分布推算小組編製的人口分布推算 2023-2031」。

1.21 Other than the assumptions aforementioned, there are many other detailed working assumptions. Changes to them may yield very different results. Although the WGPD has endeavoured to adopt the best assumptions and data sources available at the time of producing the projections, refinements of methodology may be required when more up-to-date information becomes available and new trends become apparent.

1.22 In a dynamic city like Hong Kong, population projections for small geographical units such as TPU, especially those in the distant years, are subject to larger errors. Caution should therefore be taken when using them.

1.23 Persons making reference to the projection data should take note of the above assumptions and limitations, and decide on the applicability of the projection data to any specific purposes and uses. The Government shall not be held liable for any consequences arising from using the population distribution projection data.

1.24 Users should acknowledge the “WGPD Projections of Population Distribution 2023-2031” prepared by the Working Group on Population Distribution Projections as the source when reproducing or quoting any population distribution projection data contained in this report.

特別註釋

1.25 人口數目均湊整至最接近的百位數，而百分率是由未進位的相關數字計算，並經過四捨五入的湊整至一個小數位。

1.26 由於四捨五入的湊整，統計表內個別項目的數字相加起來可能與相關的小計或總計略有出入。

Special Notes

1.25 Population figures are rounded to the nearest 100 while percentages are computed from the corresponding unrounded figures and then rounded to 1 decimal place.

1.26 There may be a slight discrepancy between the sum of individual items and the respective total or sub-total as shown in the tables owing to rounding.

2. 推算結果

全港

2.1 根據政府統計處於二零二三年八月公布的最新人口推算數字，香港人口會由二零二一年年中的 741 萬增至二零三一年年中的 782 萬。（表 1）

主要區域

2.2 推算結果顯示在二零三一年時，香港島、九龍及新界的陸上人口分別為 110 萬人、225 萬人及 446 萬人，佔全港陸上人口的比例分別為 14.1%、28.8%及 57.1%。（表 1 和 3）

2.3 新界的人口增長幅度會較九龍為高，其人口在這十年間會增加 479 500 人（或 12.0%），由二零二一年的 398 萬人增至二零三一年的 446 萬人，而九龍的人口則會增加 20 800 人（或 0.9%），由二零二一年的 223 萬人增至二零三一年的 225 萬人。（表 1 和 5）

2.4 此外，香港島的人口會由二零二一年的 120 萬人逐漸下調至二零三一年的 110 萬人。（表 1）

2. PROJECTION RESULTS

Whole Territory

2.1 According to the latest population projections released by the Census and Statistics Department (C&SD) in August 2023, the Hong Kong Population will increase from 7.41 million to 7.82 million between mid-2021 and mid-2031. (Table 1)

Broad Area

2.2 The projection results reveal that the land-based population on Hong Kong Island, in Kowloon and the New Territories in 2031 will be 1.10 million, 2.25 million and 4.46 million respectively, while the respective proportions to territorial land-based population will be 14.1%, 28.8% and 57.1%. (Tables 1 and 3)

2.3 The New Territories will experience greater magnitude of population growth than Kowloon. Its population will increase by 479 500 (or 12.0%) from 3.98 million in 2021 to 4.46 million in 2031, whereas population in Kowloon will increase by 20 800 (or 0.9%) from 2.23 million in 2021 to 2.25 million in 2031. (Tables 1 and 5)

2.4 Besides, population on Hong Kong Island will decrease gradually from 1.20 million in 2021 to 1.10 million in 2031. (Table 1)

2.5 新界新市鎮的人口增長將佔全港人口增長約 73.6%，其人口會增加 299 500 人至二零三一年的 386 萬人。（表 2 和 5）

2.6 至於主要區域的推算人口年齡結構方面，所有主要區域內的長者人口（即 65 歲及以上）比例在二零二一年至二零三一年期間均會上升，而工作年齡人口（即 15 至 64 歲）比例則會下降。（表 9）

2.7 同樣，在新市鎮的人口中，長者人口的比例會由 18.5% 上升至 28.0%，而工作年齡人口的比例則會由 70.4% 下降至 63.7%。（表 10）

2.8 以推算人口年齡中位數計算，香港島、九龍及新界在二零三一年的數字分別為 51.4 歲、50.5 歲及 49.0 歲，而新市鎮的數字則為 49.5 歲。（表 7）

區議會分區

2.9 推算小組估計元朗區、觀塘區及沙田區在二零三一年時會是所有區議會分區之中人口最多的三個區議會分區，其人口將會分別達到 760 600 人、690 700 人及 667 700 人。屆時，這三區將分別容納全港陸上人口的 9.7%、8.8% 及 8.5%。（表 1 和 3）

2.5 About 73.6% of the territorial population growth will be found in New Towns in the New Territories, where the population will increase by 299 500 to 3.86 million by 2031. (Tables 2 and 5)

2.6 With regard to the projected age structure of population in broad areas, the proportions of elderly population (aged 65 and over) within all broad areas will increase between 2021 and 2031, whereas the proportions of working age population (aged 15-64) will reduce. (Table 9)

2.7 Similarly, the proportion of elderly population in New Towns will increase from 18.5% to 28.0%, whereas the proportion of working age population will decrease from 70.4% to 63.7%. (Table 10)

2.8 In terms of the projected median age of the population, the figures for Hong Kong Island, Kowloon and the New Territories in 2031 will be 51.4, 50.5 and 49.0 respectively, while the figure for New Towns will be 49.5. (Table 7)

District Council District

2.9 Among all District Council Districts (DCDs), Yuen Long District, Kwun Tong District and Sha Tin District are projected to be the three most populous DCDs in 2031, with the population reaching 760 600, 690 700 and 667 700 respectively. By then, these three districts will accommodate 9.7%, 8.8% and 8.5% of the territorial land-based population respectively. (Tables 1 and 3)

2.10 在二零二一年至二零三一年期間，推算人口數目增長最大的三個區議會分區是離島區（增加 167 200 人）、北區（增加 125 900 人）和元朗區（增加 92 500 人）。（表 5）

2.11 在各區議會分區中，東區在二零三一年將會成為長者人口比例最高的區議會分區，其比例將會由二零二一年的 23.4% 增至二零三一年的 35.0%。離島區將會是工作年齡人口比例最高的區議會分區，雖然其比例亦會由二零二一年的 72.4% 輕微下降至二零三一年的 71.9%。離島區將會是年輕人口比例最高的區議會分區，雖然其比例會由二零二一年的 12.8% 下降至二零三一年的 10.2%。（表 9）

2.12 按不同年齡組別的推算人口分析，在二零三一年，沙田區將成為長者人口（205 900 人）最多的區議會分區，佔全港長者人口 9.3%。元朗區將成為工作年齡人口數目（500 500 人）及年輕人口數目（71 000 人）最多的區議會分區，分別佔二零三一年全港相應年齡組別陸上人口的 10.0% 及 11.6%。（表 11 和 13）

2.10 Between 2021 and 2031, the three DCDs with the largest projected population increases are Islands District (by 167 200 persons), North District (by 125 900 persons) and Yuen Long District (by 92 500 persons). (Table 5)

2.11 Among all DCDs, Eastern District will be the DCD with the highest proportion of elderly population in 2031, increasing from 23.4% in 2021 to 35.0% in 2031. Islands District will be the DCD with the highest proportion of working age population, though its proportion will reduce slightly from 72.4% in 2021 to 71.9% in 2031. Islands District will be the DCD with the highest proportion of young age population, though its proportion of young age population will reduce from 12.8% in 2021 to 10.2% in 2031. (Table 9)

2.12 Analysed by different age group of projected population, Sha Tin District will be the DCD with the largest number of elderly (205 900 persons), accounting for 9.3% of the elderly population in Hong Kong. Yuen Long District will be the DCD with the largest number of working age population (500 500 persons) and young age (71 000 persons) in 2031, accounting for 10.0% and 11.6% of the territorial land-based population of the corresponding age groups in 2031 respectively. (Tables 11 and 13)

新市鎮¹

2.13 推算小組估計在推算期內，屯門新市鎮的人口會最多，其人口在二零三一年會達至 581 200 人或佔全港陸上人口的 7.4%。（表 2 和 4）

2.14 東涌新市鎮在推算期內預計會有最大的人口增長，它的人口將在十年間增加 157 700 人（或 136.0%），達至二零三一年的 273 800 人，佔同期新界區人口增長的 32.9%。（表 2 和 6）

2.15 荃灣新市鎮—青衣地區的長者人口比例將會最高，其比例會由二零二一年的 22.0% 增至二零三一年的 33.1%。東涌新市鎮的工作年齡人口比例將會最高，其比例在二零二一年及二零三一年同為 72.9%。東涌新市鎮的年輕人口比例亦將會最高，儘管其比例會由二零二一年的 13.6% 下降至二零三一年的 11.2%。（表 10）

2.16 按不同年齡組別的推算人口分析，在二零三一年，屯門新市鎮的長者人口（166 700 人）、工作年齡人口（367 700 人）及年輕人口（46 700 人）數目均佔二零三一年全港同齡陸上人口的最高比例，分別為 7.6%、7.3% 及 7.7%。（表 12 和 14）

1

在本報告中，荃灣新市鎮中的荃灣、葵涌和青衣地區，以及沙田新市鎮中的沙田和馬鞍山地區會視為個別新市鎮作分析。

New Town¹

2.13 Tuen Mun New Town is projected to be the most populous over the projection period, with the population reaching 581 200 or 7.4% of the territorial land-based population in 2031. (Tables 2 and 4)

2.14 Tung Chung New Town is projected to have the greatest population growth during the projection period. Its population is projected to increase by 157 700 (or 136.0%) over the next ten years to 273 800 in 2031, accounting for 32.9% of the population growth in the New Territories during the period. (Tables 2 and 6)

2.15 Tsuen Wan New Town - Tsing Yi area will have the highest proportion of elderly population, increasing from 22.0% in 2021 to 33.1% in 2031. Tung Chung New Town will have the highest proportion of working age population, at 72.9% in both 2021 and 2031. Tung Chung New Town will also have the highest proportion of young age population, despite a decrease from 13.6% in 2021 to 11.2% in 2031. (Table 10)

2.16 Analysed by different age group of projected population, Tuen Mun New Town will have the largest number of elderly (166 700 persons), working age (367 700 persons) and young age population (46 700 persons) in 2031, accounting for 7.6%, 7.3% and 7.7% respectively of the same age territorial land-based population in 2031 (Tables 12 and 14).

In this report, Tsuen Wan, Kwai Chung and Tsing Yi areas under Tsuen Wan New Town as well as Sha Tin and Ma On Shan areas under Sha Tin New Town are analyzed as individual new towns.

3. 推算方法

概要

3.1 人口分布及年齡結構推算數字首先在「區議會分區／新市鎮」層面編製，當中涵蓋 (i) 在香港島及九龍的區議會分區；(ii) 在新界的新市鎮；以及 (iii) 在新界的「其他地區」—即各新市鎮以外的地方。

3.2 小規劃統計區的人口則在以「區議會分區／新市鎮」的人口作為規限總數下，基於一些粗略假設而得出。

3.3 為方便推算人口分布，香港人口分為下列的組成部分：

- (a) 陸上家庭住戶人口；
- (b) 院舍人口；
- (c) 集體住戶人口；
- (d) 水上人口；
- (e) 沒有固定居所的「流動居民」。

3.4 第一個組成部分（即陸上家庭住戶人口）佔人口的大部分，在二零二一年佔全港人口的 98%。有關這組成部分的分布及年齡結構推算方法列載於 3.6 至 3.18 段內。

3.5 其餘組成部分的人數甚少。因此，在推算其分布和年齡結構時，使用了較粗略的方法。有關方法列載於 3.19 至 3.23 段內。

3. PROJECTION METHOD

Overview

3.1 Population distribution and age structure projections are first compiled at "District Council District and New Town" (DN) level, which covers (i) District Council Districts (DCDs) on Hong Kong Island and in Kowloon; (ii) New Towns in the New Territories; and (iii) "other areas" in the New Territories, each of which covers the remaining areas not included in New Towns.

3.2 Using the population by DN as control totals, population distribution by Tertiary Planning Unit (TPU) is then derived based on some crude assumptions.

3.3 For the purpose of compiling population distribution projections, the Hong Kong Population is divided into the following components:

- (a) land-based domestic population;
- (b) institutional population;
- (c) population in collective households;
- (d) marine population;
- (e) "Mobile Residents" without regular residence.

3.4 The first component, i.e. land-based domestic population, takes up the bulk of the population (98% in 2021). The method for compiling their distribution and age structure is outlined in paragraphs 3.6 to 3.18 below.

3.5 The remaining components are all very small. Therefore, relatively crude methods as presented in paragraphs 3.19 to 3.23 are employed in projecting their distributions and age structures.

陸上家庭住戶人口²的推算

3.6 人口推算採用的標準方法為「組成部分法」。按照這方法，基準年（此次推算為二零二一年及二零二二年）的每區人口是以二零二一年人口普查的結果為基礎，再輔以其他來源（如房屋署）的相關資料編製出來，然後根據生育推算、死亡推算及人口遷移的各項推算，將基準年人口按年齡逐年推算。因涉及人口分布，故人口遷移包括內部遷移（在香港內區與區之間遷移）及外部遷移（香港與香港以外地方之間遷移）。

3.7 陸上家庭住戶人口可分為家庭住戶及「流動居民」住戶。家庭住戶指一群住在一起及分享生活所需的人士，當中至少有一名成員為「常住居民」。「流動居民」住戶則指全部成員均為「流動居民」的住戶。在推算過程中，會就每項人口變動組成部分（即出生及死亡、內部及外部遷移），計算其對每區住戶數目的影響。

Projections of Land-based Domestic Population²

3.6 The standard method of compiling population projections, i.e. the “component method”, is adopted. Under this method, the base years (i.e. 2021 and 2022 for the current exercise) population for each district is derived based on results of the 2021 Population Census, supplemented with relevant information from various sources (e.g. Housing Department). It is then brought forward by age under various projections of fertility, mortality and movement, year after year. Since population distribution is involved, movement includes both internal movement (from a district to another district within Hong Kong) and external movement (from Hong Kong to places outside Hong Kong and vice versa).

3.7 Land-based domestic population consists of either domestic households or “Mobile Resident” households. A domestic household consists of a group of persons (with at least one member being “Usual Resident”) who live together and make common provision for essentials for living. “Mobile Resident” households refer to households comprising “Mobile Residents” only. During the compilation process, for each of the population change components (viz. births and deaths, internal and external movement), the impact on the number of households in each district is worked out.

2

包括居住於臨時房屋（例如過渡房屋及簡約公屋）的人口。

Including population in temporary housing, e.g. transitional housing and light public housing.

出生及死亡人數

3.8 每區出生及死亡人數的推算數字，是由按年齡劃分的生育率及死亡率乘以對應的該區人口而得出。有關死亡率和生育率的假設，基本上與政府統計處(統計處)在編製最新的全港人口推算數字時所採用的假設相同。此外，再假設出生及死亡對住戶數目沒有影響，亦即不會引致新住戶組成或現有住戶解散。

外部遷移

3.9 這是指「居港人口」的流入及流出。在參考統計處所採用的人口推算方法後，在推算時已考慮了下列的淨流動：

- (a) 香港永久性居民進入「常住居民」類別與及香港永久性居民使用回港證作旅遊證件的淨流動；
- (b) 除單程通行證(單程證)持有人及外籍家庭傭工外，香港非永久性居民的淨流動；
- (c) 單程證持有人的流入；及
- (d) 外籍家庭傭工的流入。

Births and Deaths

3.8 The projected number of new births or deaths in each district is derived by applying the age-specific fertility rates and mortality rates to the population of the respective group in that district. The assumptions of mortality and fertility rates basically follow those adopted in the Census and Statistics Department (C&SD)'s latest projections of territorial population. It is further assumed that births and deaths will have no effect on number of households, i.e. they will not lead to formation of new households or dissolution of existing households.

External Movement

3.9 This refers to the net movements of people into the “Hong Kong Resident Population”. Making reference to the approach of C&SD's population projections, the following net movements are taken into account:

- (a) net flow of Hong Kong Permanent Residents (HKPRs) into the “Usual Residents” category and that of HKPRs travelling on re-entry permits;
- (b) net flow of Hong Kong Non-Permanent Residents other than One-way Permit (OWP) holders and foreign domestic helpers (FDHs);
- (c) inflow of OWP holders; and
- (d) inflow of FDHs.

3.10 統計處所編製的全港人口推算數字，提供了按年齡劃分的香港永久性居民進入「常住居民」類別及香港永久性居民使用回港證作旅遊證件的淨流動推算數字。採用人口的地區分布來假設這些淨流動的地區分布，而每區的年齡結構，則跟隨統計處編製的全港相應類別推算人口的年齡結構。至於對每區住戶數目的影響，則由各年齡組別的人口變動乘以假設的戶主率而得出。

3.11 全港人口推算數字提供了扣除單程證持有人及外籍家庭傭工外的香港非永久性居民的按年齡劃分的淨流動推算數字。推算小組根據二零二一年人口普查所得該類人士的分布來假設他們的地區分布情況，而他們在各區內的年齡結構，均按統計處編製的全港該類別人口推算的年齡結構而定。至於對每區住戶數目的淨影響，則由人口變動除以假設的平均住戶人數而得出。

3.12 一個地區的人口數目和年齡結構，亦會受到單程證持有人及外籍家庭傭工移入該地區內定居的人數影響。全港人口推算數字提供了按年齡編製的單程證持有人總體推算數字。推算小組根據民政事務總署向抵港未足一年的內地來港人士進行的持續性統計調查所得的結果，得出單程證持有人的地區分布。這些單程證持有在各區內的年齡結構，均假設按統計處編製的全港該類別人口推算的年齡結構而定。

3.10 The projected net flow of HKPRs into the “Usual Residents” category and that of HKPRs travelling on re-entry permits by age is given in the C&SD’s projections of territorial population. Their distribution is assumed to follow the distribution of the population and their age structure in each district is assumed to follow that of C&SD’s projections. The effect on the number of households in each district is derived by multiplying the net change in population by the assumed headship rates for each age group.

3.11 The projected net flow of Hong Kong Non-permanent Residents other than OWP holders and FDHs by age is given in the projections of territorial population. Their distribution by district is assumed to follow the distribution of those persons obtained from the 2021 Population Census and their population age structure in each district is assumed to follow that of C&SD’s projections. The net effect on the number of households in each district is derived by dividing the net change in population by an assumed average household size.

3.12 The size and the age structure of the population in a given district will also be affected by the number of OWP holders and FDHs settling in the district. The projected total number of OWP holders by age is given in the projections of territorial population. Their distribution by district is derived based on the results of a continuous survey conducted by the Home Affairs Department. The survey collects information on new arrivals who have arrived in Hong Kong for less than one year from the Mainland. Their population age structure in each district is assumed to follow that of C&SD’s projections.

3.13 大部份單程證持有人在港均有親屬。因此，推算小組假設所有這些人士到港後，均會加入現有的住戶，而不會組成任何新住戶。

3.14 全港人口推算數字提供了按年齡編製的外籍家庭傭工總體推算數字。推算小組假設在二零二一年人口普查中所得的各區外籍家庭傭工人數相對同區家庭住戶數目的比例，在推算期內會維持不變，從而計算出各個地區外籍家庭傭工的推算數字。各區的外籍家庭傭工的年齡結構，則按統計處最新推算的全港外籍家庭傭工的年齡結構而定。

內部遷移

3.15 內部遷移指人口在香港境內的遷移。它只會對人口分布有影響，而並不影響全港人口總數。

3.16 內部遷移通常由於人口遷入新落成的房屋或遷出清拆的房屋。每區新落成的房屋及清拆房屋的預測數字，是根據截至二零二三年第二季止，政府已知悉的有關房屋發展計劃的規劃資料而編製。此外，當有關房屋發展建議的資料有不足或不確定時，則會根據過往模式及專業判斷，對相關項目的完成日期、單位數目、入住情況等作出額外的假設。

3.13 A great majority of OWP holders have next-of-kin in Hong Kong. It is assumed that upon arrival in Hong Kong all of them will join existing households in Hong Kong, instead of forming any new households.

3.14 The projected total number of FDHs by age is given in the projections of territorial population. The projected number of FDHs in each district is obtained by simply assuming that their relative ratio to those domestic households living in the same district as observed in the 2021 Population Census will remain the same during the projection period. The age structure in each district follows that of the C&SD's latest projections of territorial FDHs.

Internal Movement

3.15 Internal movement refers to the movement of the population within Hong Kong. It will only affect population distribution but not the territorial population.

3.16 Internal movement usually results from population moving in newly completed flats or moving out from demolished flats. Forecasts of flats newly completed and demolished in each district are derived from planning information regarding future housing developments known to the Government up to the second quarter of 2023. In addition, additional assumptions are made regarding completion dates, flat numbers, in-take profiles, etc. of specific housing development projects based on past patterns and professional judgment where information is inadequate or uncertainties exist under the development proposals concerned.

3.17 根據各新落成的房屋及清拆房屋的預測數目，再加上從二零二一年人口普查及行政記錄所得的資料，可得出各區遷入及遷出的各年齡組別人口及住戶數目。

3.18 內部遷移亦可因人口遷移於現有房屋之間。從二零二一年人口普查的結果可計算出一套按地區劃分的內部遷移比率，再加上一些行政記錄的資料，從而得出各區人口及住戶的淨流動。

次要組成部分的推算

院舍人口推算

3.19 院舍人口包括居於懲教機構、社福機構、政府資助安老院、精神科醫院／療養院、學生宿舍、酒店及旅舍的人士，其總人數及地區分布的推算數字主要是根據各個政府部門或機構提供的資料，按院舍類型編製。鑑於院舍人口年齡模式的性質獨特，推算小組在推算院舍人口的年齡結構時，主要假設推算期間各地區居於不同類型院舍的人士，其年齡結構與二零二一年人口普查或二零二二年年中行政紀錄（選取其中合適者）的情況相同。

3.17 Based on the forecast numbers of newly completed and demolished flats, the population by age group and number of households going to move in and out are derived based on profiles obtained in the 2021 Population Census and administrative records.

3.18 Internal movement also results from population moving between existing housing units. The net movement of population and households in each district is derived from a set of district-specific internal movement rates computed based on the 2021 Population Census results and administrative records.

Projections of Minor Components

Projections of Institutional Population

3.19 Institutional population consists of persons residing in penal institutions, social welfare institutions, government subvented elderly homes, psychiatric hospitals/infirmaries, student dormitories, hotels and hostels. The projections of the total numbers as well as the distribution are mainly compiled by type of institution based on information provided by the respective government departments or institutions. In view of the uniqueness of their age patterns, their projected age structures are mainly derived by assuming the respective patterns of population in different type of institutions at district level will remain constant as that observed in the 2021 Population Census or from the administrative records at mid-2022 (whichever appropriate) throughout the projection period.

3.20 至於住在私營安老院的總人數，推算小組先從近年的數字計算出每個年齡組別中，安老院人口（包括政府資助及私營安老院）佔香港人口的比例，然後將這些比例套用於推算期內的推算人口得出安老院人口，再扣除居於政府資助安老院的人口，從而得出有關人口的推算數目。其地區分布則假設跟近年的情況相同。

集體住戶人口推算

3.21 集體住戶指一群住在一起但並不分享生活所需的人士，例如居住在同一僱主所提供的員工宿舍內的僱員。集體住戶人口的推算人數及地區分布均假設與二零二一年人口普查情況相同。

水上人口推算

3.22 根據一個簡單數學模型的結果，在推算期內，水上人口（指居於船艇上人士）預計會跟隨其以往下降的趨勢而逐年減少。其年齡結構則假設與二零二一年人口普查的情況相同。

3.20 The total number of persons residing in private elderly homes is projected by first applying the age-sex specific proportions of the Hong Kong population residing in elderly homes (including government subvented and private elderly homes) as in recent years to the projected population during the projection period to derive the population in elderly homes. It is then discounted by those in government subvented elderly homes. Their geographical distribution is projected by assuming the same distribution pattern as observed in recent years.

Projections of Population in Collective Households

3.21 A collective household comprises a group of persons who live together but do not make common provision for essentials for living, such as employees living together in the staff quarters provided by the same employer. For population in collective households, it is assumed that the projections of the total number as well as the distribution are the same as those observed in the 2021 Population Census.

Projections of Marine Population

3.22 According to the results of a simple mathematical model, marine population (persons living on marine vessels) is projected to shrink gradually during the projection period, following past declining trend. The projected age structure is assumed to be the same as that observed in the 2021 Population Census.

沒有固定居所的「流動居民」推算

3.23 在港沒有固定居所的「流動居民」於二零二一年只佔人口的 0.5%。他們的推算數目，是簡單地假設在推算期內每區的家庭住戶人口中，沒有固定居所的「流動居民」所佔的比例會跟二零二一年人口普查時相同。各區年齡結構則假設和該推算年全港該類別居民的年齡結構相同。

全港總住戶數目及總人口的協調

3.24 將上述各組成部分加起來便得出各區的初步住戶及人口推算。雖然上述步驟已考慮了人口變化及其分布的主要組成部分，但仍有一些較次要的部分未全面考慮，如長者遷入安老院及住戶的分拆。各區住戶數目及人口的合計亦可能與全港的推算數字不同。因此，推算的最終步驟是微調各區的初步推算數字，使其跟全港的推算數字相符。

Projections of “Mobile Residents” without Regular Residence

3.23 “Mobile Residents” who do not have a regular residence in Hong Kong only accounted for 0.5% of population in 2021. The projections of this group are derived by simply assuming that the ratio of “Mobile Residents” without regular residence to domestic population in each district will remain the same as that observed in the 2021 Population Census throughout the projection period. Their age structure in each district is assumed to be the same as that of the whole territory of the projection year concerned.

Reconciliation between Total Number of Households and Total Population in the Territory

3.24 Preliminary projections of number of households and population for each district are derived by summing up the above components. While the above procedures have taken into account the major components of changes in population and its distribution, some minor components, such as movement of elderly people to elderly homes and splitting of households, have not been fully accounted for yet. The number of households and population aggregated over all districts may also not be consistent with the projected territorial totals. The last step is therefore to fine-tune the preliminary projections by reconciling them with the territorial totals.

3.25 協調分為兩步。首先，各區的住戶數目會調整，以令合計的住戶數相等於統計處公布的全港推算數字³。各區的調整幅度是基於該區的吸納容量而得出。吸納容量是指區內屋宇單位於某年的住用程度與假設的正常住用程度⁴的差別。各區的人口亦會按住戶數目的變動而調整。

3.26 經調整後的各區人口合計仍可能與全港的推算數字不同。各區人口會再進一步調整，以令各個年齡組別的人口均與全港的推算數字相符。

3.25 The reconciliation takes two steps. Firstly, the number of households in each district is adjusted such that the aggregated number of households tallies with that for the whole territory³ released by C&SD. The adjustment for each district is derived by making reference to the in-take capacity of the district. For a given year, the in-take capacity is taken as the gap between the level of occupancy of the year concerned and the respective level of assumed “normal” occupancy⁴. The population in each district will also be adjusted accordingly.

3.26 The adjusted population aggregated over all districts may still not tally with the projected territorial population. The population in each district will be further adjusted such that the aggregated population will tally with the projected territorial population in all age groups.

3

統計處於 2023 年 8 月公布了一套至 2046 年的全港家庭住戶推算。

A set of territorial household projections up to 2046 was released by C&SD in August 2023.

4

考慮到住戶因遷入或遷出而出現的「正常」空置率，有一個特定比例的私人房屋單位因某年住戶數目的不足而仍然空置。假設在沒有限制住戶數目的情況下，私人房屋單位可達到的住用程度便是「正常」的住用程度。

Allowing for a certain level of “normal” vacancy as households are moving in and out, a certain proportion of private housing flats will be left unoccupied owing to insufficient number of households for a particular year. Assuming that there are unconstrained number of households, the level of occupancy that private housing flats can attain is the “normal” occupancy level.

小規劃統計區的人口推算

3.27 小規劃統計區的人口推算，採用了類似上述有關區議會分區及新市鎮的推算方法。

3.28 大部分推算所用的參數只是按區議會分區／新市鎮或更廣闊區域釐定，而應用這些參數於小規劃統計區的層面，是基於非常粗略的假設。因此，按小規劃統計區劃分的推算人口，誤差較按區議會分區及新市鎮劃分的為大。

Projections of Population by Tertiary Planning Unit

3.27 Projections of population by TPU are compiled using similar methods for DCDs and New Towns mentioned above.

3.28 Most of the parameters used in the compilation are available only at DCD/New Town or broader level. Therefore, these parameters are applied at the TPU level based on very crude assumptions. Hence the projected population by TPU is subject to a larger error than those by DCD and New Town.

表

TABLES

表 1：二零二三年至二零三一年按區議會分區劃分的人口推算數字
Table 1 : Projected Population by District Council District, 2023-2031

(以年中計算 as at mid year)

沙田／西貢其他地區 [†]	Other Areas in Sha Tin/Sai Kung [†]	1.1	1.4	1.0	1.4	0.6	1.0	1.0	1.3
所有新市鎮	All New Towns	48.6	51.9	48.6	49.1	45.4	49.0	48.0	49.3
所有新界其他地區 [†]	All Other Areas [†]	6.5	9.5	6.0	8.3	4.4	6.1	5.8	7.8
新界陸上總計	Whole New Territories Land Total	55.2	61.4	54.6	57.4	49.8	55.1	53.8	57.1

註釋：以上數字和表13的數字一樣，都是指有關年齡組別的人口佔該年齡組別陸上總人口的百分比。

Note : Figures above, like those in Table 13, indicate population of the broad age group expressed as percentage of the respective territorial land population.

[†] 「其他地區」的數字亦包括新市鎮擴展區及主要新發展區截至有關年份的推算人口。

Figures for “Other Areas” also include the projected population for New Town Extension and major New Development Areas up to relevant years.

APPENDICES

地理分界制度
- 區議會分區
Geographical Demarcation Systems
- District Council District

區議會分區	District Council District	區域	Region
1. 中西區	Central and Western District	香港島	Hong Kong Island
2. 灣仔區	Wan Chai District		
3. 東區	Eastern District		
4. 南區	Southern District		
5. 深水埗區	Sham Shui Po District	九龍	Kowloon
6. 九龍城區	Kowloon City District		
7. 黃大仙區	Wong Tai Sin District		
8. 觀塘區	Kwun Tong District		
9. 油尖旺區	Yau Tsim Mong District		
10. 葵青區	Kwai Tsing District	新界	New Territories
11. 荃灣區	Tsuen Wan District		
12. 屯門區	Tuen Mun District		
13. 元朗區	Yuen Long District		
14. 北區	North District		
15. 大埔區	Tai Po District		
16. 沙田區	Sha Tin District		
17. 西貢區	Sai Kung District		
18. 離島區	Islands District		

註釋：水上居民並未歸納在以上任何一個區議會分區內。

Note: Marine population is not grouped under any of the above District Council Districts.

地理分界制度
- 新市鎮／新界其他地區
Geographical Demarcation Systems
- New Town/Other Areas in the New Territories

新市鎮／新界其他地區 New Town /Other Areas in the New Territories		主要區域 Broad Area	地理範圍 Geographical Coverage
1. 荃灣—荃灣地區	Tsuen Wan - Tsuen Wan area	新市鎮 New Towns	各新市鎮界線乃採用土木工程拓展署及規劃署所訂定的新市鎮發展範圍。 The delineation of the areas into new towns is adopted from the boundaries developed by the Civil Engineering and Development Department and Planning Department for new town development purposes.
2. 荃灣—葵涌地區	Tsuen Wan - Kwai Chung area		
3. 荃灣—青衣地區	Tsuen Wan - Tsing Yi area		
4. 將軍澳	Tseung Kwan O		
5. 屯門	Tuen Mun		
6. 元朗	Yuen Long		
7. 天水圍	Tin Shui Wai		
8. 沙田—沙田地區	Sha Tin - Sha Tin area		
9. 沙田—馬鞍山地區	Sha Tin - Ma On Shan area		
10. 大埔	Tai Po		
11. 粉嶺／上水／古洞	Fanling/Sheung Shui/Kwu Tung		
12. 東涌	Tung Chung		
13. 洪水橋／廈村	Hung Shui Kiu/Ha Tsuen		
14. 荃灣／葵青／離島 其他地區	Other Areas in Tsuen Wan/ Kwai Tsing/Islands	其他地區 Other Areas	新界地區的其餘部分，按其區議會分區的地理位置劃分為其他地區 The remaining parts of the New Territories are divided into other areas according to their District Council District geographical locations.
15. 屯門／元朗其他地區	Other Areas in Tuen Mun/ Yuen Long		
16. 北區／大埔其他地區	Other Areas in North/Tai Po		
17. 沙田／西貢其他地區	Other Areas in Sha Tin/ Sai Kung		

註釋：水上居民並未歸納在以上任何一個地區內。
主要區域也包括香港島和九龍。

Notes: Marine population is not grouped under any of the above districts.
Broad Area also includes Hong Kong Island and Kowloon.

區議會分區與小規劃統計區的概括對照
Broad Conversion Between District Council District and Tertiary Planning Unit

人口分布推算小組進行推算時採用區議會選舉選區分界。全港共有 18 個區議會分區，其中 4 個在香港島，5 個在九龍及 9 個在新界。

District Council Districts (DCDs) adopted in the WGPB projections are those for the District Council Election. There are 18 DCDs: 4 on Hong Kong Island; 5 in Kowloon and 9 in the New Territories.

為進行城市規劃，全港土地根據 2021 年人口普查共分為 292 個小規劃統計區。每個小規劃統計區均以獨一無二的三位數字作為識別。

For town planning purposes, the whole land area of Hong Kong is divided into 292 Tertiary Planning Units (TPUs) according to the 2021 Population Census. Each of the TPUs is identified by a unique three-digit number.

按小規劃統計區概括劃分的 18 個區議會分區載列如下：

The broad demarcation of the 18 DCDs by TPU is given below :

區議會分區 <u>District Council District</u>	小規劃統計區 <u>Tertiary Planning Unit</u>

新市鎮／新界其他地區與小規劃統計區的概括對照
Broad Conversion between New Town/Other Areas
in the New Territories and Tertiary Planning Unit

人口分布推算小組所採用的新市鎮界線與土木工程拓展署及規劃署所訂定的新市鎮發展範圍相同。新界其他地區涵蓋新市鎮以外的新界地方。這 4 個其他地區是由新市鎮以外的兩個或以上的新界區議會分區的其他地方合組而成，它們分別是荃灣／葵青／離島其他地區、屯門／元朗其他地區、北區／大埔其他地區及沙田／西貢其他地區。

Boundaries of the New Towns adopted by the WGPD are identical to the New Town boundaries developed by the Civil Engineering and Development Department and Planning Department for new town development purposes. Other Areas in the New Territories cover the rest of the New Territories outside New Towns. There are 4 Other Areas which are formed by combining the remaining areas outside New Towns of two or more District Council Districts in the New Territories, namely, Other Areas in Tsuen Wan/Kwai Tsing/Islands, Other Areas in Tuen Mun/Yuen Long, Other Areas in North/Tai Po and Other Areas in Sha Tin/Sai Kung.

為進行城市規劃，全港土地共分為 292 個小規劃統計區。每個小規劃統計區均以獨一無二的三位數字作為識別。

For town planning purposes, the whole land area of Hong Kong is divided into 292 Tertiary Planning Units (TPUs). Each of the TPUs is identified by a unique three-digit number.

按小規劃統計區概括劃分的新市鎮及新界其他地區載列如下以供參考：

A broad conversion between New Town/Other Areas in the New Territories and TPU is given below for reference:
