No. 23 - Tai Long Bay

Site

The site is the beach of Tai Long Bay. The area is about 2.3 hectares.

Date of Designation

20 September 1979

Special Scientific Interest

The interesting plant formation, which is typical of sandy beaches, shows a nice zonation from the sea landwards and the plants show adaptations to this special environment of sandy substrate with considerable salinity.

Degree of Hazard

The site is under the pressure of recreational development. There is the risk of the vegetation being damaged by picnickers and campers.

Recommended Protection Measures

The site is adjoining the Sai Kung East Country Park. Recreational pressure should be channelled away from the site.
