No. 40 - Nai Chung Coast

Site

This site covers an area extending about 0.87 km along the coast near the ferry pier. The area is about 2.2 hectares.

Date of Designation

24 September 1982

Special Scientific Interest

The site is of geological interest, to the west of the pier there is a good contact of granite with sediments and to the east there is exposure of black pyritic carbonaceous shales. These are rare geological features in Hong Kong.

Degree of Hazard

Development will damage these features.

Recommended Protection Measures

The Agriculture & Fisheries Department should be advised of and consulted on any development proposals which will affect the site.
