7. WAY FORWARD

7.1.1. Heritage conservation, tourism attractiveness enhancement and financial viability are the three major objectives in the rejuvenation of the Site.

7.1.2. The present Study has addressed the above objectives by adopting a mixed retail-cultural development scheme, which is founded on the baseline review, option generation, evaluation and technical assessments undertaken in the Study. It is recommended that on the basis of the findings of this Study, the private sector should be invited to develop the Site without delay, and the once secluded site would be open for public enjoyment as soon as possible.
